EDUCATION

Monash Professional Pathways, Melbourne

Mar 2024 - Mar 2025

Professional Year ICT Professional Year Program

Deakin University, Burwood

Mar 2021 - Oct 2023

Bachelor of Computer Science

Relevant Coursework: Object Oriented Development, Data Structures & Algorithms, Advanced Algorithms, Frontend Development, Backend Development

SKILLS

- Programming: Java, Python, JavaScript, TypeScript, C#, C, HTML/CSS, GraphQL, SQL, PostgreSQL
- Software & Tools: .NET, React.js, Node.js, MongoDB, Firebase, Docker, AWS

WORK EXPERIENCE

Focus Bear Pty Ltd: Frontend Developer Intern

Nov 2024 – Feb 2025

- Engineered an intelligent activity suggestion system using historical user behaviour data to enhance user's experience and engagement through relevant and personalized suggestions
- Redesigned and launched a modernized web dashboard interface, introducing a side snapping summary panel and background timer, improving task visibility and increasing average session time
- Resolved over more than 100 critical and minor frontend bugs using advanced debugging tools, which reduced UI crashes and errors by more than 50%, significantly improving reliability
- Crafted responsive and intuitive UI/UX components in Figma and implemented them in React,
 collaborated in writing unit and integration test cases, achieving 90% test coverage pre-deployment

Yaarn Pty Ltd: Full Stack Developer Intern

Jul 2023 - Sep 2023

- Built a Python scraper extracting article metadata (authors, titles, summaries) from all news sites
 with GPT integrated to auto-generate summaries, and deployed a scalable SQL database to manage
 and secure scraped website data for more than 5,000 records, ensuring uptime and reliable access
- Wrote and executed more than 100 unit and integration tests using PyTest, catching and resolving backend issues before deployment, significantly improving system reliability
- Developed an interactive user interface to complement backend scraping services and designed the introduction page, enabling seamless access and navigation of aggregated content across devices

PROJECTS

DevLink Freelancing Web Application

- Architected and delivered a full-stack freelancing marketplace using React.js and Node.js, integrating Firebase, Stripe, OpenAI GPT, and SendGrid APIs to connect freelancers with employers
- Engineered secure Stripe payment processing with Payment Intents for AUD transactions and developed intelligent OpenAI GPT-powered job description generation to assist user
- Implemented Firebase auth (email/password, Google OAuth) with email verification, real-time Firestore for dynamic job filtering, and automated SendGrid notifications using custom templates
- Optimized application performance with React Router client-side routing, component-based architecture, and responsive cross-platform design
